

## PatientStyle Gowns

With superior performance fabrics, innovative wrap-around designs, and easy access features essential for critical care, PatientStyle gowns are one-of-a-kind. Available in a tie or IV snap design, our gowns have an extra-large sweep, so the patient's backside is never exposed! The overlapping panels eliminate the need for "double" gowning, and the unique wrap-around design wraps in the back and ties at the side so patients can dress themselves easily, freeing nurses to focus on clinical care. With our signature knit interlock fabric, our gowns feel like the cozy pajamas you wear at home.

PatientStyle does not stop at hospital gowns. We offer pediatric patient apparel, modesty gowns, specialty nursing gowns and wrap around mammography tops. All garments provide comfort and modesty and are offered in fun prints and solids..

Medically required functionality  
Telemetry pocket  
An additional cell phone pocket

PatientStyle offers women the comfort and confidence they deserve during a hospital stay or routine outpatient visit. Multiple studies have shown that early detection is crucial to successful breast cancer treatment and recovery. Emotional discomfort often plays a role in why many women delay or avoid their annual exams or appointments. That's why we designed the PatientStyle mammography top with both comfort and dignity in mind. Made from our signature-soft fabric, it features modest, overlapping panels that tie on either side—making it both patient and technician-friendly.
